

Electrical Preventive Maintenance & Testing

**Whether you manage a building or run a business, it's important to protect and sustain your investments in property, systems, inventory and people.**

That's where McPhee Electric can help. From electrical service or electrical repairs to comprehensive preventive maintenance programs and services, to 24/7 emergency response and resolution, our staff of electricians and technicians is trained, certified, experienced and ready to evaluate your systems and help you maximize your investment.

**Guard against unexpected power interruptions or failures. Improve safety. And lower operation costs.**

It's a fact that 80% of electrical interruptions originate on the business side of the electric meter. That means your side of the meter – right in your own building, office or shop. These interruptions or outages can pack a punch to your productivity and profitability. And if they occur, they do so without warning. Until now.
