Northeast Utilities Data Center Expansion

OWNER	NORTHEAST UTILITIES SYSTEM
Location	Wethersfield, CT
Project Value	\$3 million
Completion date	2004
Major Challenge	Very limited shutdown window
General Contractor	McPhee Electric
DESCRIPTION OF WORK	
<p>Critical power expansion of gear capacity from 3000A to 4000A in a data center facility that handles information from nuclear generator stations. This very sensitive data limited the shutdown windows to only 36 hours. Other work performed included adding static transfer switches as well as several UPS modules for backup protection. McPhee also performed as the prime contractor on this project.</p>
