

# Bayonne Dry Dock & Repair Corp Pump Feeder Replacement

McPhee Electric completed the restoration and hardening of facility electrical infrastructure in the wake of unprecedented flooding. Replacements included 5kV feeder to dry dock dewatering pumps. An aggressive project schedule permitted New York Harbor's largest dry dock to accept a U.S. Navy vessel scheduled for a critical U.S. Department of Homeland Security overhaul. The project was completed in accordance with all Port Authority of New York & New Jersey requirements. Bayonne Dry Dock & Repair Corp. operates a full-service ship repair yard located in the Port Jersey area of New York/New Jersey Harbor. Conveniently situated just miles from the Verrazano Bridge, the Bayonne facility has no aerial draft restrictions and is ideal for both commercial and government vessels.
