

PSE&G Hinchman & Hawthorne Substation Upgrades

McPhee Electric completed all electrical and civil work associated with the replacement of the 230kV line and ground disconnect switch. This included the conversion of 230kV circuit switcher to a live tank breaker, the addition of a separate disconnect switch, replacement of two, 230kV disconnect switches at Hinchman, and replacement of a 230kV line and ground disconnect at Hawthorne for PSE&G.
